About the Exhibition

BUILDMACEX is an international exhibition and conference platform focused on transforming the building and construction industry to connect businesses and consumers. Through creativity and technology, it aims to accelerate change in every aspect of architecture, building, and construction designs in West Africa.

The three (3) days event—exhibition, conference, and B2B—will showcase a comprehensive range of technologies and innovation, architectural (design) trends, latest styles, and innovative solutions for creating inspiring structures.

This isn't just about showcasing products; it's about fostering a vibrant community of professionals and enthusiasts. Experts gather in conference sharing knowledge and insights on topics like sustainable building practices, emerging technology in construction, and the latest trends in architectural design.

The event offers a platform for networking, connecting industry leaders, architects, contractors, suppliers, and passionate homeowners. It's a space for collaboration, where ideas are exchanged, partnerships are formed, and the future of building takes shape.

What to Expect

All international and indigenous professionals are welcome to join the BUILDMACEX community. Whether you are a professional seeking the latest advancements in construction machinery, a homeowner aspiring to construct their ideal building, or simply curious about the creative forces shaping our built environment, Buildmacex offers a captivating journey of inspiration.

Connect
with professionals
and network with people
that fits your niche at
